

THE UNICELL ADVANTAGE

ONE OF A KIND

Each Unicell van body is created using our patented programmable fiberglass application machine, which enables Unicell to design and build van bodies that are more aerodynamic and better styled than conventional methods and materials allow.

RUGGED

Unicell's unique construction is built to withstand abuse: our fiberglass bodies are tougher and more puncture resistant than .040" aluminum bodies or 1/2" plywood, leading to fewer ugly dents and costly repairs.

SLEEK

Our bodies are manufactured from one-piece molded fiberglass, which means no seams, caulking, or unsightly rivets, just an uninterrupted, smooth, glossy white gel-coat finish. Unicell bodies look great on their own, or provide the perfect canvas for vinyl graphic wraps.

LIGHTWEIGHT

Unicell presents the best van body choice pound for pound: our bodies are as light as any aluminum sheet and post design but considerably stronger, and they are far lighter than any FRP construction.

LONG-LASTING

Unicell bodies are built to last and backed by our 5-year limited warranty. Our fiberglass design makes repairs quicker and easier than for other constructions, which puts you back on the road sooner. Unicell's reputation for quality results in consistently higher value upon resale.

The AeroCell Sport

The AeroCell Sport bridges the gap between cargo vans and cube vans. Designed exclusively for the tough, dependable, comfortable and stylish Ford E350 single rear wheel cutaway chassis, this new van body offers all of the same benefits as the original AeroCell: one piece molded fiberglass construction, seamless and glossy gel coat exterior, and aerodynamic styling.

The Perfect Tool For

RETAILERS

HVAC

PAINTERS

PLUMBERS

ELECTRICIANS

Standard Features

AERODYNAMICS

Curved sides for aerodynamic styling and strength

BULKHEAD

Bulkhead wall with 6" setback
Bulkhead sliding door with 25" clear opening

BUMPER

Galvanized Steel Grip-Strut

DOOR

Full Width Double Door

EXTERIOR

Fiberglass Construction
Gel Coat Surface
HD steel understructure
Lights
Protective undercoating

FLOOR

Tough 3/4" plywood floor
Wheel boxes

INTERIOR

Tough polyethylene lining
Weatherproof wiring system
24" LED dome light with timer switch
Leak-proof integral skylight
Stainless steel grab handles on each side
Built-in air deflector with inside storage shelf
Low easy step up floor height

CARGO CONTROL

Cargo control track with rings and attachment hardware
Storage Tray
